

FELM, in the electric motor sector since 1960

Electric Motors - www.felm.it

About us

FELM® has been operating in the electric motor sector since 1960 and it has a well-consolidated background in the rotating electrical machinery market. Thanks to the considerable experience of its staff, FELM® can guarantee a technical back-up capable of responding to the most sophisticated technical requirements, installations and maintenance; ensuring the highest standards Service to its own international customers.

Special attention is given to the production process in the factory, from the careful selection of the materials, copper, insulation, the execution of the windings, to the control of the impregnation and polymerization processes (VPI).

The high levels of quality offered by FELM® are proven by the ISO 9001:2015 ICIM Certificate 2508/2:

- Production of standard electric motors and special motors made according to customer specifications.
- Commercialization of special electric motors and relative electrical or electronic accessories for the construction and distribution of electric motors.

Our mission

- Offering experience and applications knowledge
- Continuous support about customer need
- A product range to satisfy: Price, Quality and Service

Technical office and Service

Composed by persons with various experiences matured in manufacturing prestigious companies of electric motors.

Software Programs: PDF, AutoCAD (2D-3D), DWG and Motors program calculation.

Sites

Utilizing our large stock and production of electric motors (our offices, workshop and warehouse cover over 16,000 m²) from 0.12 kW to 6 MW and a widespread distribution network, FELM® guarantees product availability and rapid delivery in Italy and across Europe.

Five sites:

Inveruno (Milano - Italy) 13,000 m².

Via Varese 3,500 m² Head quarter Offices

Via Morandi 6,000 m² workshop, warehouses

Via Fattori 3,500 m² warehouse

2,500 m² windings and Repair HV Motors Windings from 300 to 3 MW.

1,500 m² windings and Repair Low Voltage Motors Winding from 1 to 1500 kW and brake motors up to 55 kW.

Production & Partners

- Windings and Repair HV Motors Windings from 300 to 3 MW.
- Windings and Repair Low Voltage Motors Winding from 1 to 1500 kW and brake motors up to 55 kW.
- Repair and Motors Winding for DC and Sleeve Ring Motors
- Workmanship of special shafts
- Specialized in the Lathe-turner's work and press for steel sheets work processing
